

Denim Hobo Bag

how-to^{by} michele beschen

This bag was designed around a readymade purse pattern for a hobo bag (available at any fabric store) and altered to suit the desired style. We widened the bottom of our bag and lengthened the strap. Add decorative zippers and pouches/pockets to the front, back and inside.

To mimic the dip-dyed denim leathers, create markings on your denim using a bleach pen where desired.

Add magnetic clasp to secure closed.

Take this idea and make it your own!
